Summary

Systems Engineering professional and Tech Lead with 6+ years of experience designing, developing, and deploying enterprise-level web and mobile applications. Specialized in Full Stack architectures using Ruby on Rails and JavaScript, with a strong focus on robust AWS infrastructure and native/cross-platform mobile development (Kotlin, Swift, KMP). Expert in leading technical teams, optimizing engineering processes, and building high-availability scalable solutions.

Education

Instituto Tecnológico de Querétaro (ITQ) Computer System Engineer	Bachelor of Engineering Querétaro, Qro • August 2016 – January 2022
---	--

Experience

Koonol México Tech Lead / Senior Full Stack Developer	Zapopan, Jal. (Remote) April 2021 – April 2026
---	---

- **Technical Leadership:** Supervised a team of 5 engineers, improving project delivery efficiency by 20% and successfully launching 3 key product features within budget.
- **Cloud Architecture:** Designed and managed robust, scalable AWS infrastructures for high-traffic CRM and administration systems, reducing server downtime by 15%.
- **Full Stack Development:** Led the development of complex web platforms and native mobile applications (Kotlin/Swift), focusing on performance and security.
- **Mentorship:** Conducted code reviews and technical training sessions to improve team delivery quality and developer growth, successfully onboarding 4 new developers.

Gurúcomm Software Developer	Querétaro, Qro July 2019 – April 2021
---------------------------------------	--

- Developed, optimized, and maintained scalable web applications using Ruby on Rails and JavaScript, improving overall application performance by 25%.
- Collaborated in the full software development cycle, implementing clean code principles and architectural best practices to accelerate feature deployment by 15%.

Gurúcomm Trainee Developer	Querétaro, Qro August 2019 – November 2019
--------------------------------------	---

- Collaborated with a small team to develop and integrate new features for corporate web platforms using Ruby on Rails and Ember JS, reducing manual data entry by 15%.

Projects

DEMO Multi-tenant CRM Platform

Period: April 2026 – Present

Role: Fullstack Developer | **Stack:** Ember.js, JavaScript, Docker, Vercel

Developed a scalable multi-tenant CRM frontend designed for enterprise sales management. Focused on modular component architecture and seamless integration with complex backend APIs to handle diverse tenant requirements and high-volume data visualization.

<https://crm-demo.soyamaury.dev/>

E-Commerce Solutions

Period: 2021 – 2026

Role: Tech Lead | **Stack:** Multi-tenant, Fintech, Carrier Integration, Audit System

Engineered scalable e-commerce platforms with secure payment integrations and complex inventory management, successfully handling up to 5,000 concurrent users during peak sales events.

Discord Management BOT

Period: May 2026 – Present

Role: Fullstack Developer | **Stack:** TypeScript, JavaScript, Docker

Developed a TypeScript-based automation tool for community management and gaming integration, streamlining server moderation and event scheduling for a community of over 500 active users.

White-Label Consumer Ecosystem

Period: 2021 – 2026

Role: Lead Mobile Engineer | **Stack:** Swift, Kotlin, Stripe, Openpay, FEMSA

Architected and led the development of a white-label mobile ecosystem serving multiple enterprise brands. Integrated secure payment gateways and managed the full production release cycle for a suite of branded iOS and Android applications.

Enterprise POS Platform

Period: 2021 – 2026

Role: Senior Mobile Developer | **Stack:** Kotlin, Android SDK, Stripe, Openpay

Developed a high-performance Point of Sale (POS) Android application for enterprise retail. Focused on transaction security, real-time inventory synchronization, and seamless integration with diverse fintech payment processors.

Customer Multiplatform App (KMP)

Period: 2024 – 2026

Role: Tech Lead / Mobile Architect | **Stack:** Kotlin Multiplatform (KMP), Swift, Clean Architecture

Led the strategic migration of a large-scale mobile ecosystem to Kotlin Multiplatform. Reduced code maintenance overhead by 40% by centralizing business logic while maintaining native-level performance and UI consistency.

Scalable Top-up Portal

Period: 2021 – 2026

Role: Full Stack Developer | **Stack:** React, High Availability, Telco Integration

Built a white-label mobile recharge portal optimized for high availability and accessibility. Implemented deep telco integrations for carrier-side provisioning, allowing users to recharge services even under constrained network conditions.

Consumer Self-Service CRM

Period: 2021 – 2026

Role: Lead Developer | **Stack:** Ruby on Rails, React, Scalability, B2C

Directed the development of a high-traffic B2C self-service portal. Engineered the platform to handle massive concurrent traffic, providing users with real-time account management, secure payment processing, and automated consumption monitoring.
